Introduction

F6 Control is a remote control application designed for use with **CCOP**. **F6** Multitrack Field Recorders (hereafter, "the recorder" in this manual). Including control of recording, playback and mixer adjustments, this app allows you to operate the recorder from an iOS device.

This manual does not explain operation of the recorder unit itself. See the **F6** Operation Manual for detailed information about all its functions.

Installing F6 Control

- **1** Open the App Store on the iOS device and search for "F6 Control".
- **2** Tap "GET" on the F6 Control screen. This will install F6 Control on the iOS device.

Connecting with the recorder

NOTE

• A separate ZOOM BTA-1 Bluetooth adapter must be installed in the recorder to remotely control it from an iOS device. For details, see the operation manual.

6. Use (and () to select Connect,

and press 🕢

7. Launch the dedicated app on the iOS device.

This opens a Bluetooth device list in F6 Control. Tap the device name/ID to start connecting. When connection completes, "Connected" will appear on the recorder display.

(The Bluetooth device list will not appear in iOS 12 and earlier versions.)

NOTE

Operation screen overview

Navigation between screens

HOME screen (iPad version)

In the iPad version, all operations available on the MIXER screen are possible on the HOME screen. There is no separate MIXER screen.

HOME screen

When F6 Control launches, the HOME screen appears.

MIXER screen

Character input screen

The character input screen appears for inputting the names of takes and folders, for example.

	No SIM	eturn			3:42 PN er Na				e 🗆	
Number of characters — (input/total possible) Text box —								Ent	er	2
1	q	w	e [r t	t J	/ l	_ ۲	i o	р	
	а	s	d	f	g	h	j	k	Ι	
	¢	z	x	С	V	b	n	m	$\overline{\otimes}$	
	123		Ŷ		spa	ace		Do	one	

1 Input characters using the keyboard.

The input characters appear in the text box.

NOTE

· The following characters can be input. (space) ! # \$ % & ' () + , - 0 1 2 3 4 5 6 7 8 9 ; = @ A B C D E F G H I J K L M N O P Q R ST U V W XYZ[]^_`abcdefghijklmnopqrstuvwxyz{}~ Except when inputting a "Note", you cannot put an @ mark or a space at the beginning.

2. When done inputting, tap Enter

Confirm the input characters.

Tap **Return** to cancel the input.

Preparing to record

Setting recording file format

No SM 3:42 PM Image: Comparison of the compar	No SIM 16:18 0: √ 0 7 1% I Return MENU 2 FINDER REC	No SIM 3142 PM REC Mode Linear()
	META DATA (for Next Take)	WAV File Format Poly >

	AMBISONIC MODE	> LR Track On >
A Tr4	Αυτο ΜΙΧ	> Pre Rec Off >
5 Tr5	SET DATE/TIME	
6 Tr6	VERSION	>
	BACKGROUND MODE On	>

- **1** Tap **EMENU** on the HOME screen.
- **2** Tap "REC" on the MENU screen.
- **3** Tap "WAV File Format" on the REC screen, and change the settings.

Recording

Selecting inputs

Select which among Inputs 1-6 to use.

1 Tap the track selection buttons on the HOME screen for the inputs to record.

The buttons light red for the tracks that will be recorded and appear dark for those that will not be recorded.

Linking inputs as a stereo pair

You can use track pairs 1/2, 3/4 and 5/6 as stereo tracks.

- **1** Tap **PFL** on the HOME screen for a track to link it in stereo.
- **2** Tap "Stereo Link" on the PFL screen, and change the setting.

Adjusting input levels

- **1 Tap MIXER on the HOME screen.** On an iPad, skip this step.
- 2 On the MIXER screen (HOME screen on iPad), drag up/ down the input trim knob for a track to adjust its level.

NOTE

 $\cdot \,$ Double-tap an input trim knob to reset it to the default value.

Recording

1 Tap **O** on the HOME screen.

- **1** Tap **E**MENU on the HOME screen.
- **2** Tap "REC" on the MENU screen.
- **3** Tap a setting on the REC screen and change it.
 - Mode

Set the bit depth of WAV files.

Sample Rate

Set the sampling rate used to record files.

MP3 Bit Rate

Set the bit rate of recorded MP3 files.

LR Track

Set whether the LRTrack is recorded or not.

Pre Rec

Set the pre-recording function, which captures audio before recording starts, to On/Off.

12

Changing recording take settings

You can change the recording take scene name, for example.

1 Tap **MENU** on the HOME screen.

- **2** Tap "META DATA (for Next Take)" on the MENU screen.
- **3** Tap a setting and then change it.

Scene Name

Set how the scene name will be assigned to the next take recorded.

Note

Input characters for a note to use as metadata in the next take recorded.

Track Name

Edit the track name used for the next take recorded.

Playing recordings

Selecting a take for playback

1 Use **Market and Market on the HOME screen**.

Doing this changes the playback take.

Playing recordings

1 Tap **D** on the HOME screen.

Mixing takes		
NO DIM 342PM	NO SIM 3.44 FM 0 0 190101_002 190101_002 100102 100102 0000 0000 0000 0000 0000 0000 0000 0000 0000 0000 0000 0000 0000 0000 0000 0000 0000 0000 00000 0000 00000 0000 0000 0000 0000 0000 0000 0000 00	

1 Tap **I** on the HOME screen.

On an iPad, skip this step.

3 Adjust parameter settings on the MIXER screen (HOME screen on iPad).

Adjusting pan faders

Drag a pan fader left and right to adjust its value.

NIC
INC

NOTEDouble-tap a pan fader to reset it to the default value.

Adjusting level faders

Drag a level fader up and down to adjust its value.

NOTE

Double-tap a level fader to reset it to the default value.
 If already set to its default value, doing this mutes the track.

Folder and take operations

Opening the FINDER screen

Check and edit folders and takes on SD cards in the recorder on the FINDER screen.

	No SIM	No SIM 3:42 PM @

IIIIIIIIIIIIIIIIIIIIIIIIIIIIIIIIIIIIII	AMBISONIC MODE >	
4 Tr4	AUTO MIX >	
5 Tr5	SET DATE/TIME >	
6 Tr6 PFL	VERSION	
	BACKGROUND MODE On >	

- **1** Tap **MENU** on the HOME screen.
- **2** Tap "FINDER" on the MENU screen.

Opening SD cards and folders

- **1** On the FINDER screen, tap the name of the folder that you want to open. A list of folders and takes inside that folder is shown.
- **2** Tap **Return** to move up one level.

• Working with folders and takes

When working with folders and takes, you can check their information, change their names and edit their metadata.

1 To work with a folder/take, tap the **(**) to the right of its name.

This opens the OPTIONS screen where you can check the following information.

Selected item	Data item name	Description
SD card	Free	Open space
	Size	Size
	Remain	Remaining recordable time
Folder	Path	Folder path
	Date	Date created
	Time	Time created
Take	Path	Take path
	тс	Timecode
	FPS	Frame rate
	Len	Length
	Fmt	Recording format
	Date	Date created
	Time	Time created
	Size	Size

Explanation of information shown

2 Tap an item to change its setting or work with it.

Select

Use this procedure to select the folder that contains the take to be played back or the folder to use for recording takes, and return to the HOME screen.

NOTE

 $\cdot\;$ When an folder is selected, the first file inside it will be selected.

Rename

Change the folder or take name (\rightarrow "Character input screen" on page 8).

Meta Data Edit

Check and edit take information (metadata).

Settings related to input signals

Adjusting the input signal monitoring balance

1 Tap **MIXER** on the HOME screen.

On an iPad, skip this step.

2 Adjust the parameter settings.

NOTE

 $\cdot\,$ These volume and pan settings only affect the monitoring signals. They have no effect on recorded data.

· If you tap to switch to L/R, you can change the L/R level.

Making individual track settings

Use the PFL screen to make settings for individual tracks.

1 Tap **PFL** on the HOME screen for the track to set. This opens the PFL screen.

2 Tap the setting to change on the PFL screen and change it.

Input Source

Set the input source of each track.

Phantom

Phantom power can be turned on/off and it is voltage set for each input separately.

Trim

This adjusts the input level.

Stereo Link

This sets the stereo linking of the input.

Stereo Link Mode

Signals from a mid-side format stereo mic input through stereo-linked tracks are converted to an ordinary stereo signal.

HPF

The high pass filter can cut low frequencies to reduce the sound of wind, vocal pops and other noise.

Input Limiter

The limiter can prevent distortion by controlling input signals that have excessively high levels.

Phase Invert

The phase of the input signal can be inverted.

Input Delay

If there are differences in the timing of input sounds, use this function to correct them when recording.

Fader

Adjusts the level of the input signal.

Pan

Adjusts the stereo balance of the sound.

PFL Mode

On the PFL screen, you can set the monitoring sound to be either pre-fader listening (PFL) or post-fader solo (SOLO).

Settings related to output

Adjusting output levels

- **1** Tap MIXER on the HOME screen. On an iPad, skip this step.
- 2. On the MIXER screen (HOME screen on iPad), tap **11** to switch to the L/R or LINE screen.
- **3** Drag output level faders up and down to adjust their levels.

Settings related to ambisonic recording

Making settings for ambisonic recording

- **1** Tap **MENU** on the HOME screen.
- **2** Tap "AMBISONIC MODE" on the MENU screen.
- **3** Tap a setting on the AMBISONIC MODE screen and change it.

Format

Set the ambisonic recording format.

Mic Position

Set the mic position used for ambisonic recording.

Settings related to the auto mix function

Activating the auto mix function

- **1**. Tap **MENU** on the HOME screen.
- **2** Tap "AUTO MIX" on the MENU screen.
- **3** Tap input tracks on the AUTO MIX screen to enable the auto mix function for them.

Playing a test tone

A test tone can be played in order to adjust the level of a connected device.

1 Touch **on the HOME screen**.

This starts output of the test tone. Stop touching a to stop the test tone.

NOTE

• When adjusting the level used with a device connected to the LINE OUT jack, touch a while

adjusting the LINE OUT level.

Other functions

Setting the date and time

The recorder date and time can be set to the system clock values of the iOS device.

No SIM 3:42 PM @ =	No SIM 🗢	16:18 MENU	@ 🕫 🖉 71% 🔲 -		No SIM	3:42 PM MENU	•

- **1** Tap **E**MENU on the HOME screen.
- **2** Tap "SET DATE/TIME" on the MENU screen.
- **3** Tap "OK" on the confirmation pop-up. This completes setting the recorder date and time.

Viewing the F6 Control version

You can check the F6 Control version.

- **1** Tap **MENU** on the HOME screen.
- **2** Tap "VERSION" on the MENU screen.

Showing track names

The name of each track can be shown.

1 Tap a level meter.

Tapping alternately shows or hides all the track names.

F6 Control and an FRC-8 can be used at the same time

While F6 Control is connected to a recorder, an **FRC-8** can also be connected to the recorder and used at the same time.

When using F6 Control and an **FRC-8** at the same time, F6 Control functions as a monitor. For this reason, only the following F6 Control functions will be usable. Other functions will be disabled.

- · OUTPUT display switch button
- · MIXER button (iPhone only)
- · MAIN button (iPhone only)
- · Switching track name display on/off

NOTE

 $\cdot\,$ When the recorder is being used as an audio interface, the recorder cannot be connected with F6 Control.

Using F6 Control in the background

F6 Control can continue operating in the background on an iOS device without disconnecting from the recorder.

- **1** Tap **EMENU** on the HOME Screen.
- **2** Tap "BACKGROUND MODE" on the MENU screen.
- **3** Tap "On" on the BACKGROUND MODE screen.
