Version 3.00

- Released as following function updates and bug fixes in February 2019

■ Function Updates

1. Added Advanced Look-Ahead Hybrid Limiters.
2. Added Zoom AutoMix™ function.
3. Added headphone boost function (up to +24dB).
4. Improved Timecode Precision when powered off.
5. Added ability to record to SD card and use as audio interface simultaneously (up to 48kHz).
6. Added some other new functions. For details please refer to the F4 Version 3.0 Supplementary Manual.

■ Bug Fixes

1. The time reference of recorded files is slightly shifted when the frame rate for timecode is set to 29.97D.

Version 2.00

- Released as following function updates and bug fixes in December 2017

■ Function Updates

1. Added a new function of Ambisonic Mode through which Ambisonics A-format signals can be converted to B-format for recording.
2. Added some other new functions. For details please refer to the F4 Version 2.0 Supplementary Manual.

■ Bug Fixes

1. The issue was corrected where recording may start 1 frame earlier than the normal operation when the timecode mode is set to "Int Record Run".

Version 1.00

- Released as mass production in September 2016
